

Project Status

The initial focus of the Centennial Building Project is to assess the current state of the building to determine what is needed to make it structurally sound and accessible by all members of the community. To do so, we need to identify what types of activities and amenities are desired. An Online Survey has been developed to solicit feedback from our residents and community members. By completing the survey and sharing with your Ben Avon friends and neighbors, you will have a stake in the next 100 years of Ben Avon Borough Hall.

Please take a few moments to complete our [Online Survey](#) to include your thoughts on the project direction.

Please check back from time to time as we will be updating this site with more information about the project and its progress.
